

MyPatients

# INTRODUCING THE MYPATIENTS APPLICATION

THE ONE TOOL EVERY PRACTICE SHOULD HAVE.

THE MYPATIENTS APP WILL REPLACE THE PATIENT TILE AND MEMBER SITE. DOCTORS WILL NEED THE APP TO ACCESS PATIENTS' INFORMATION. TO ADHERE TO THE DATA PRIVACY REQUIREMENTS, THERE ARE SEPARATE ACCESS LOGINS FOR DOCTORS AND PRACTICE MANAGERS.

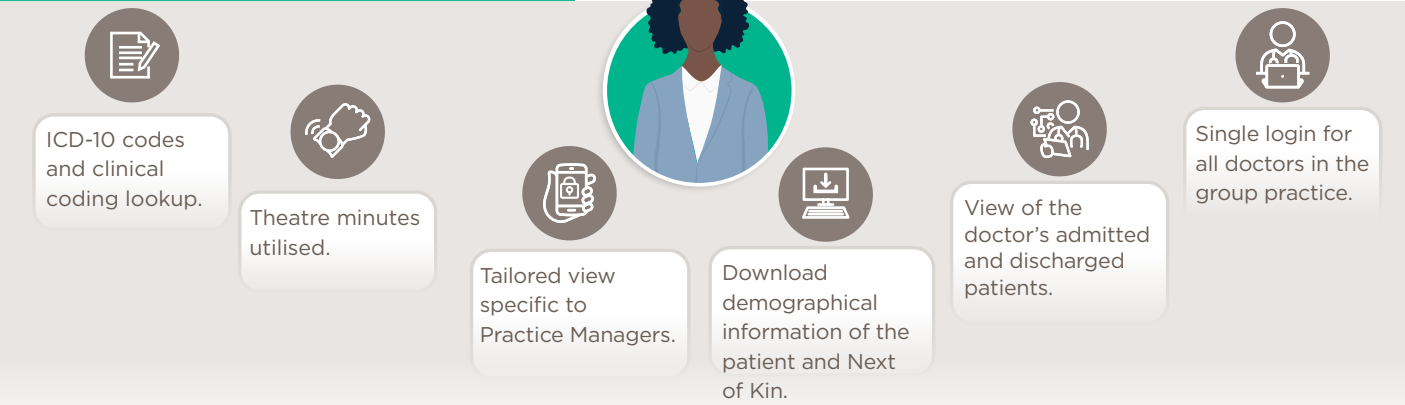

## FUNCTIONS FOR DOCTORS

This infographic features a central circular image of a male doctor in a white coat. Surrounding this central image are eight circular icons, each with a corresponding text box describing a function of the app for doctors. The functions include adding ICD-10 diagnoses, viewing admitted patients and their locations, viewing patients across all hospitals, accessing a Clinical Viewer for past admission information, viewing Theatre Lists, searching for patients to add to care teams, and referring patients to other specialists.

-  Add an ICD-10 diagnosis to the patient's record.
-  A view of admitted patients and their location.
-  A view of patients admitted across all Mediclinic hospitals (where applicable).
-  Access to Clinical Viewer containing past admission information, including Care Connect information.
-  Access to view Theatre List. Two-week history, and two weeks in advance.
-  Search for a patient, and add to the care team.
-  Refer a patient to another specialist.

## FUNCTIONS FOR PRACTICE MANAGERS

This infographic features a central circular image of a female practice manager in a blue blazer. Surrounding this central image are eight circular icons, each with a corresponding text box describing a function of the app for practice managers. The functions include ICD-10 coding lookups, viewing theatre minutes, tailored views for practice managers, downloading demographic information, viewing admitted and discharged patients, and single logins for group practices.

-  ICD-10 codes and clinical coding lookup.
-  Theatre minutes utilised.
-  Tailored view specific to Practice Managers.
-  Download demographical information of the patient and Next of Kin.
-  View of the doctor's admitted and discharged patients.
-  Single login for all doctors in the group practice.
