

ADVANCED PROSTATE TREATMENT NOW AVAILABLE

AT MEDICLINIC WINDHOEK, WE ARE PROUD TO INTRODUCE A STATE-OF-THE-ART, MINIMALLY INVASIVE TREATMENT FOR BENIGN PROSTATIC HYPERPLASIA (BPH).

This advanced procedure offers greater precision, improved safety and faster recovery times, ensuring optimal outcomes for our clients.

The Holmium Laser Enucleation of the Prostate is a significant step forward in prostate care, offering greater precision, improved safety and faster recovery for clients. This includes efficient, precise tissue removal and enhanced client safety while reducing procedural delays.

BENEFITS OF THE BPH TREATMENT INCLUDE:

- 1** No upper prostate size limit
- 2** Ideal for larger prostates that would otherwise typically require open procedures
- 3** Reduced bleeding and irrigation
- 4** A safer option, especially for clients on blood thinners
- 5** Faster recovery
- 6** Many clients are discharged the same day or within 24 hours
- 7** Lower recurrence rates
- 8** Minimises the need for further surgical intervention
- 9** Improved levels of prostate-specific antigen (PSA)
- 10** PSA levels often decrease after treatment, supporting long-term prostate health

We are here to assist if you have clients who could benefit from this advanced BPH treatment.

For referrals or more information, contact **Dr JAW Becker** on **061 272 156**, johan.becker@mediclinicnetwork.com or admin.drbecker@mediclinicnetwork.com

We value your partnership in delivering exceptional, client-focused care and look forward to working with you.
