

COVID-19 EMERGENCY CENTRE VISITATION

Mediclinic believes that allowing patients access to their loved ones is an essential part of their recovery and wellness, but we understand that it is still important to manage the risk for all.

Please note the following:

- Visitation is restricted for patients who are COVID-19 positive or suspected COVID-19 patients. Exceptions include the parent/guardian of a patient who is a minor or the family member/carer of a vulnerable patient
- A designated family member/support person (that has passed hospital access control) may be allowed to accompany all other patients in the Emergency Centre
- All visitors are required to wear a mask at all times

ALL VISITORS MUST be cleared through hospital access control.
