

Dear Patient/next-of-kin of the patient

Mediclinic understands that your doctor has prescribed Ivermectin as part of the treatment for COVID-19.

It is standard practice that all medication prescribed to a hospitalised patient is dispensed from the hospital pharmacy. Mediclinic only procures medication that is registered with the South African Health Products Regulatory Authority (SAHPRA) or made available by SAHPRA through a special Section 21 approval process. This implies that Mediclinic only procures medication from suppliers which comply with rigorous safety standards from the point of manufacture until the medication is delivered to the hospital pharmacy.

Neither Mediclinic nor SAHPRA has done any checks on the supplier of the Ivermectin that you are bringing into the hospital. We thus do not accept any responsibility therefor, unless this product was dispensed under Section 21 approval. In such a case, please provide proof to the pharmacy manager.

With kind regards,

**Dr Gerrit de Villiers**  
 Chief Clinical Officer  
 Mediclinic Southern Africa

**Douglas Defty**  
 Pharmacy Services Executive  
 Mediclinic Southern Africa
